

Layers of the Earth

Identify the layers of the earth and their average thicknesses.

Layer of the Earth	Thickness of Each Layer of the Earth
Crust	32 km
Mantle	2900 km
Outer core	2250 km
Inner core	1300 km

Composition

Layers of Earth's Crust

	Thickness (km)	Density g/cm^3	Pressure Range	Temperature Range	Depth Range
Crust					
Mantle					
Outer Core					
Inner Core					

① How does density change with depth?

② How does pressure change with depth?

③ How does temperature change with depth?
